

Manufacturing Mass Finishing Solutions

# VTG-3816 Vibratory Finishing Machines

## **In-Stock and Ready to Ship\***

The most common and versatile of all vibratory finishing styles of equipment with two simultaneous actions working in tandem to finish parts.

- Parts tumble within media in a toroidal motion
- Machine vibrates at 1,450 RPM
- Parts are deburred quickly
- Finer, more complete finish than traditional tumblers
- 3.8 cubic feet
- Standard voltage and screen types available on in-stock machines\*\*
- Manual gate and screen size of your choice
- Same quality Vibetech equipment you've come to expect and rely on
- Excellent value and superior service you deserve
- Additional machines in stock and ready to be customized to your needs with shortened lead times
- Credit card payments accepted

**Limited Time Only – Available While Supplies Last!**

\*Ships within 5 business days. Full payment required prior to shipping.  
\*\*Standard voltage: 230/460. Standard screen type: cast urethane.  
Non-standard voltage and screen types available for an additional charge.

Proudly built in the USA
